EDUCATION

Higher Secondary Certificate (HSC) June 2018

S.I.C.E.S college (BSC in computer science) June 2023

Full stack Development course from (UPGRADE) 6th December 2023

COURSE WORK

COURCE: Object-oriented programming , Data structures & Algorithm, Database management System , Operating system , cyber security

SKILLS

Proficient in

HTML , CSS, JAVASCRIPT, REACT JS, NODE JS, EXPRESS JS, MONGODB

Other: REST APIs, Razorpay Integration, Cloudinary, OneDelhivery, GSAP, Framer Motion, DigitalOcean Deployment

PROJECTS

1. Client E-commerce Website – Gausamvardhan (MERN Stack | Production)

Developed a high-level production-ready e-commerce website for a real client using the MERN stack. Integrated **Razorpay** for payments, **OneDelhivery** for logistics, and deployed the application on **DigitalOcean Cloud**. Implemented secure APIs, admin-level controls, and optimized performance for real-world traffic.

https://www.gausamvardhan.com

2.Production Website (PDF Hosting)

Built a production-level PDF hosting website using the MERN stack to provide downloadable resources for learning purposes.

Project link: https://pdf-baba.com

3. React.js Website – Nexyrait Solution

Developed a responsive business website using React.js with a modern UI and optimized performance. Focused on component-based architecture and clean code structure.

https://nexyraitsolution.netlify.app

4. Developed a full-stack e-commerce application using the MERN stack (MongoDB, Express.js, React.js, Node.js)

Implemented features such as user authentication, product listing, shopping cart functionality, and payment integration.

Project link: [https://mons-ecommerce.onrender.com], [https://aniket-ecom.onrender.com]

5.Portfolio Website (MERN Stack)

Project link: [https://portfolio-4-8gnu.onrender.com]

6. Chat Application (MERN Stack with Socket.io)

Developed a real-time chat application with instant messaging, user authentication, and end-to-end encryption

Project link: [https://chat-application-je46.onrender.com]

7. React.js Project with Animation UI

Developed a project with advanced animation and UI elements using React.js and libraries like Framer Motion

Project link : [https://aniketsinghproject.netlify.app]

8. Responsive Website (Next.js)

Created a responsive website using Next.js This project demonstrates my ability to build mobile-friendly, visually appealing web applications.

Project link: https://uifry-app-one.vercel.app

9. Dog API Website (React.js)

Built a website using the public Dog API to display random dog images. This project showcases my skills in API integration and handling asynchronous data fetching in React.

Project link: https://react-api-mons.netlify.app

10.Animation Project (HTML, CSS, JavaScript)

Developed a project focusing on animations using HTML, CSS, JavaScript, and GSAP.

Project link: https://aniket-animation-65247d.netlify.app

11.Responsive Design Project (Next.js)

Created a responsive design project specifically for Android devices.

Project link: https://nextjs-bano.vercel.app

12.User API Project (Next.js)

Developed a project fetching and displaying public user API details.

Project link: https://nextjs-userlist-theta.vercel.app
